Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's request for the rejoining of the product and method of making or using claims would be considered once all the product claims are in condition for allowance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-13, 27, 34 are rejected under 35 U.S.C. 102(e) as being anticipated by Allison et al. (US 2003/0217517).

Allison describes a chemical mechanical polishing pad comprising an organic polymer including polyol and di-isocyanate (paragraphs 0029, 0030, 0035, 0037) and a catalyst including zirconium octoate, bismuth, or ferric acetylacetonate (claimed metal agent with B-diketonate ligand) (paragraph 0042).

Referring to claim 4, the pad further contains polyfunctional hydroxyl and polyfunctional amine (paragraph 65).

Art Unit: 1765

Referring to claims 2, 5, 27 pad comprises of polyester, polyurethane (paragraph 0026).

- Referring to claim 9, the pad is used to polish metal feature on the wafer isolated during the polishing (paragraph 0004).

Referring to claims 11-13, since the pad is made of the same chemicals as that of the claimed invention, it would inherently perform with the same physical characteristics as that of the claimed invention.
